According to recent automotive surveys, March is a good time to look for a [cheap used BMW](#) . This is largely due to the registration plate change on the first of the month so there is a sudden resurgence of second hand BMW in the market place as people part exchange their existing vehicles for a brand new car. The other contributory factor is leasing companies de-fleeting vehicles as contract hire vehicles come to the end of their finance agreement. Big Motoring World have over 500 used BMW but this figure will increase post March. This dealer is located near the M20 in Kent so handy for London.
